

SPORTS SEATING COLLECTION

CONNECTING PEOPLE THROUGH SEATING

Stadiums are where history is written, legends are born, and fans come together in celebration of sport. At Ferro Seating, we combine innovative design, robust engineering, and uncompromising safety to deliver seating systems tailored for world-class sports stadiums and arenas.

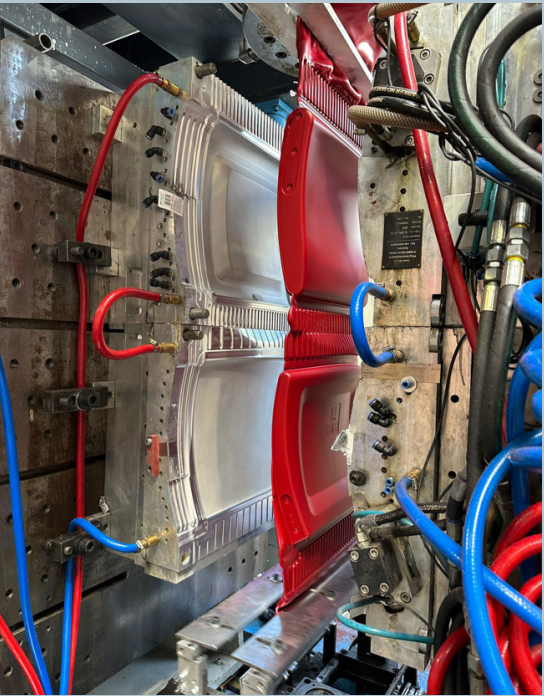

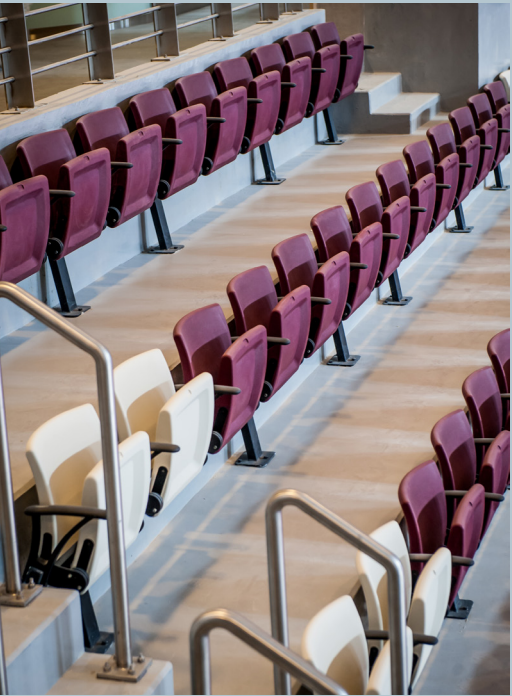

Ferro's general admission seating is built - highly durable, visually appealing, and designed for comfort and long-lasting performance. Meanwhile, our padded seating range is crafted for luxury, offering luxurious experience and create valuable revenue opportunities in exclusive areas.

From local clubs to international stadiums, our seats are engineered for all types of sporting environments, both indoor and outdoor, and rigorously tested to meet British and European standards. Every model is certified for:

- UV Resistance
- Fire Safety
- Strength and Durability
- Formaldehyde & TVOC Emissions

At Ferro, we are committed to helping you build stadiums that deliver both excitement and profitability, with a focus on safety, design, and sustainability. We craft seating solutions that enhance the spectator experience while ensuring your venue is built to last.

Ferro Seating — Creating Iconic Stadium Experiences.

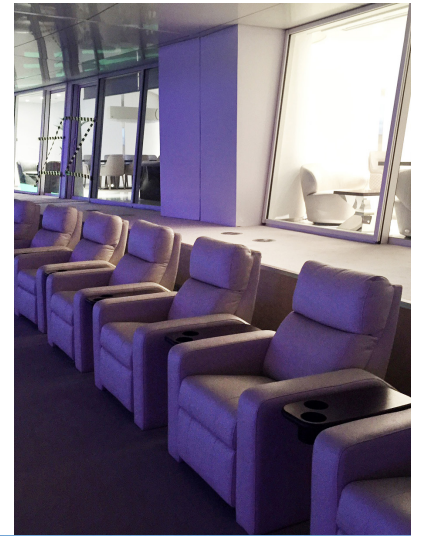

DESIGNED FOR STADIUMS, BUILT FOR FANS

In the world of stadiums and sports arenas, where passion runs high and every seat is a gateway to unforgettable moments, Ferco delivers seating solutions that are built for the ultimate spectator experience. From roaring crowds to nail-biting finishes, we understand that comfort, durability, and efficient crowd movement are essential to making every game day seamless and memorable.

Ferco designs with purpose—offering flexible configurations, safety-first materials, and ergonomic comfort tailored to the needs of fans, clubs, and stadium operators. Whether it's a national arena or a local ground, our solutions adapt to your vision while withstanding the demands of high-capacity use.

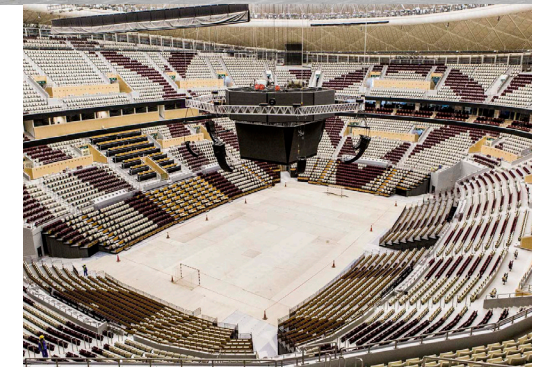

Our commitment goes beyond manufacturing. We partner with clients at every stage—from concept to installation—to create seating environments that enhance fan engagement, celebrate team spirit, and meet global standards of safety and performance.

Ferco Seating and Eheim Möbel, both established leaders in public seating design and manufacturing, collaborated in 2005 to create the Arc range of stadium seating. As proud members of the Kotobuki Seating Group from Japan and Eheim Möbel from Germany, our combined expertise of over 60 years ensures that we offer a diverse selection of seats that cater to the needs of modern stadiums and arenas.

Our seats are designed and manufactured to the highest international standards for safety, stability, durability, and flammability, prioritizing the comfort and well-being of spectators. At Ferco Seating, we take pride in our dedication to excellence, ensuring that our seating solutions exceed expectations and deliver an unmatched experience for any sporting or entertainment event.

The ARC Seat Family is a versatile seating solution that brings together comfort, functionality, and lasting performance. Designed for today’s dynamic stadium environments, ARC seats are engineered to accommodate diverse needs — from general admission to premium seating zones.

With a sleek, unified aesthetic across its range, the ARC series helps stadiums create a visually cohesive look while supporting fan comfort, efficient crowd flow, and long-term durability. Built to handle the rigors of high-capacity venues, ARC is the reliable choice for sports arenas that aim to deliver an exceptional experience, every time.

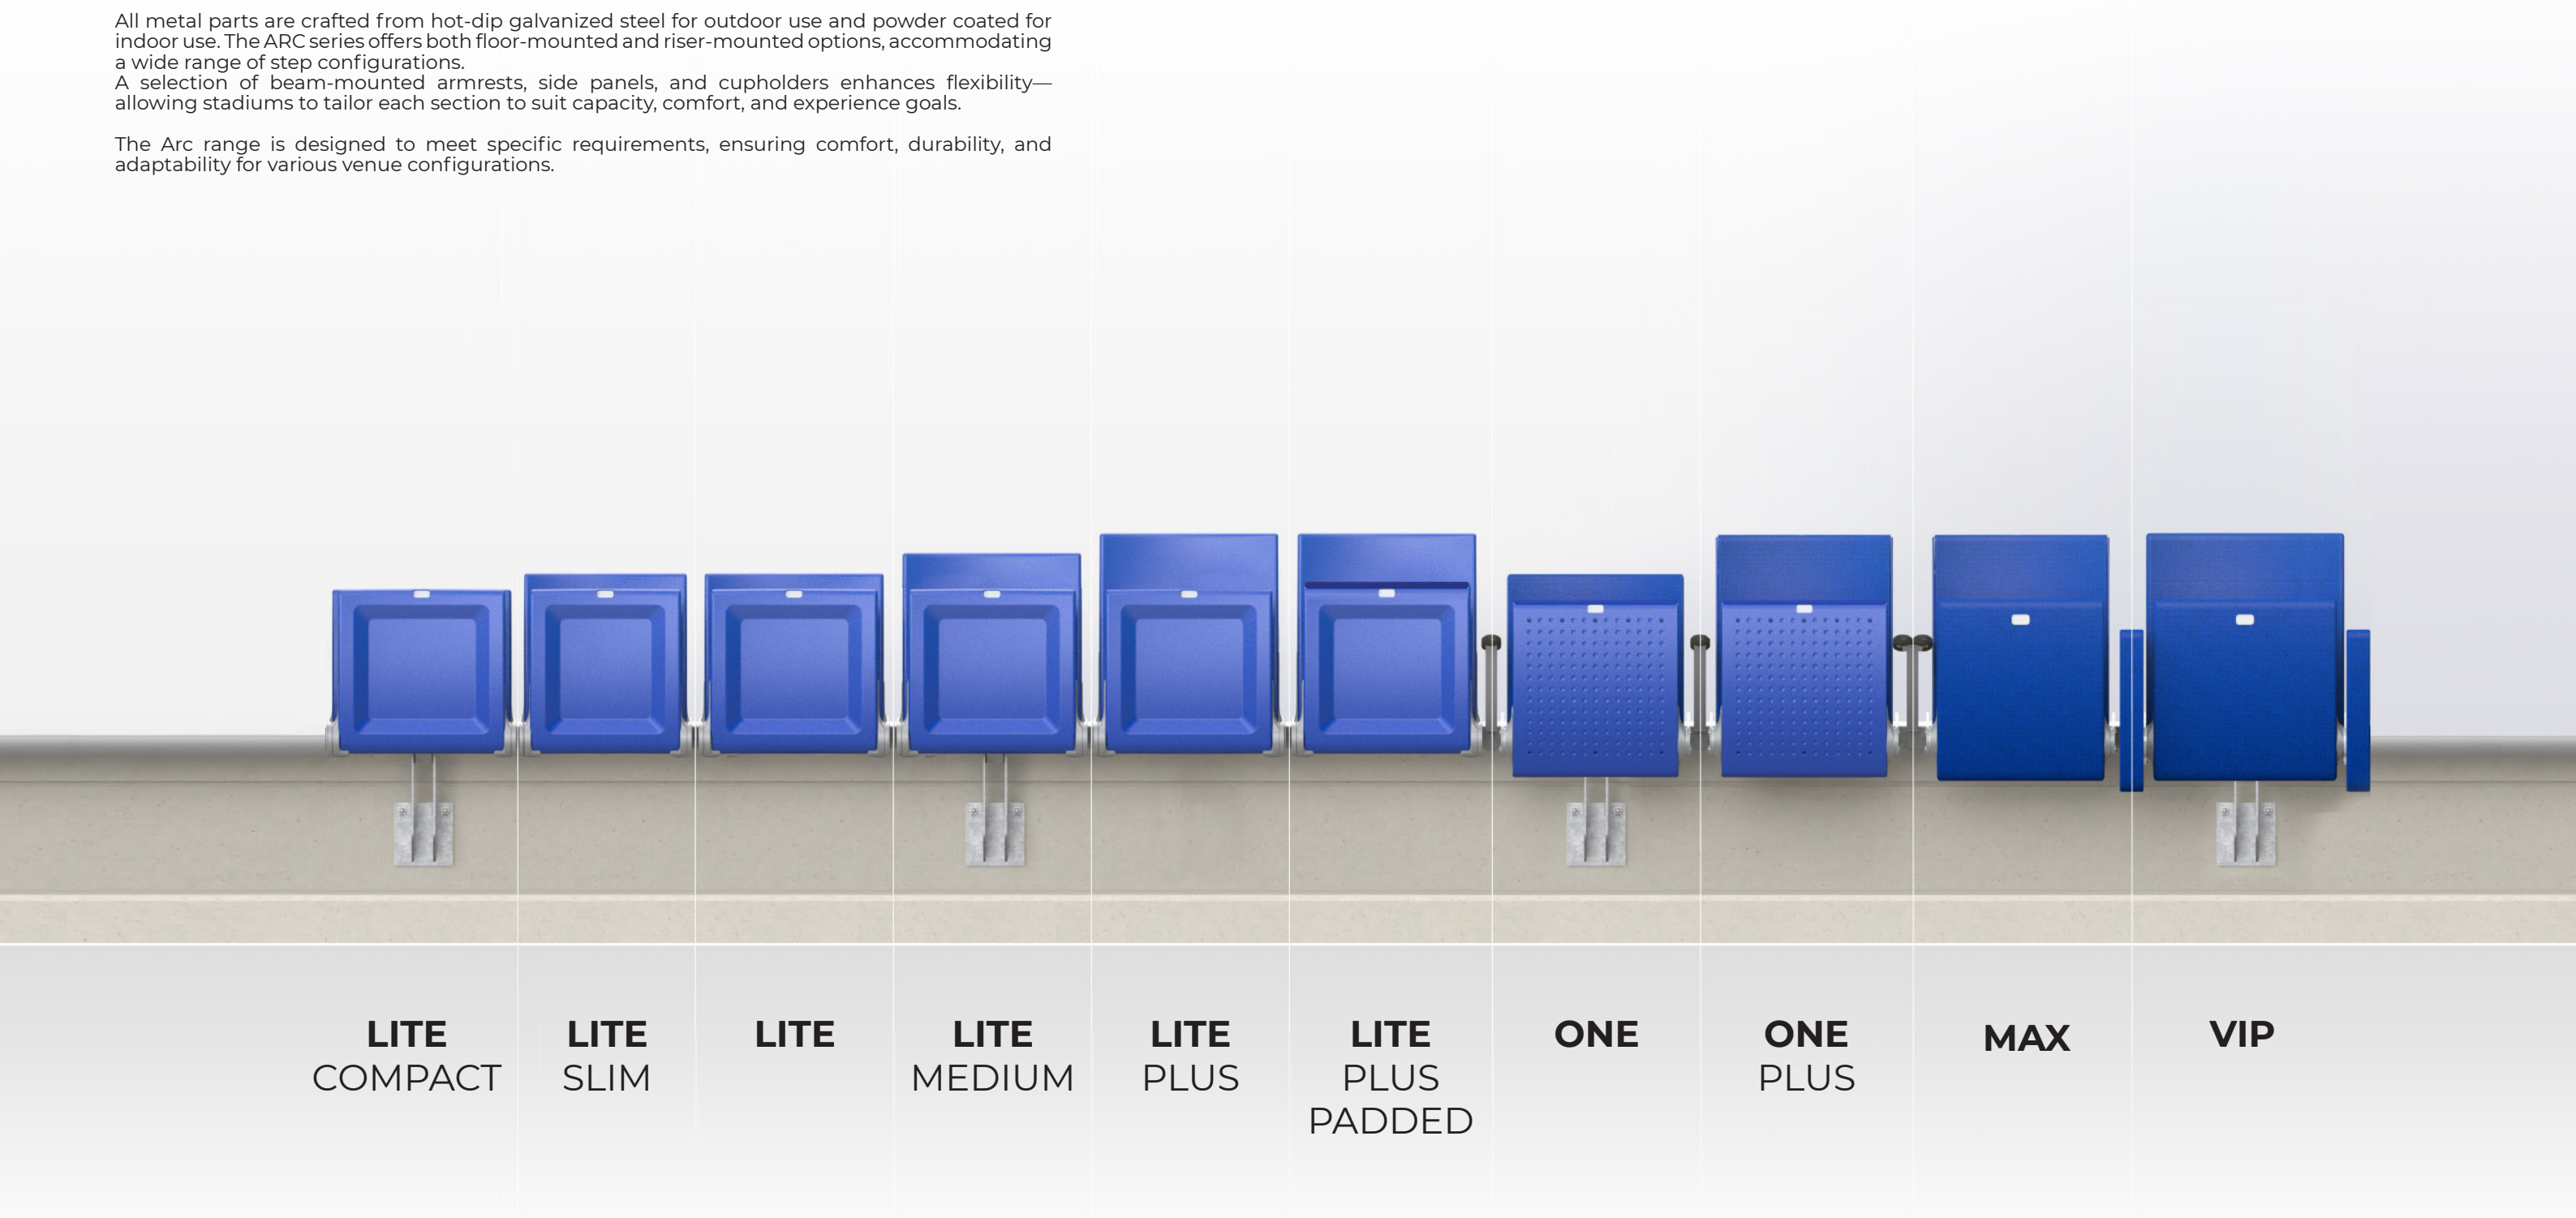

Overview of the ARC Seat Family

The ARC Seat Family is defined by its signature contemporary square back design, creating a unified and modern aesthetic across all seating tiers. Engineered for ease of installation and long-term durability, each seat is mounted on a robust beam structure that ensures precise alignment and structural consistency throughout the venue.

All metal parts are crafted from hot-dip galvanized steel for outdoor use and powder coated for indoor use. The ARC series offers both floor-mounted and riser-mounted options, accommodating a wide range of step configurations. A selection of beam-mounted armrests, side panels, and cupholders enhances flexibility—allowing stadiums to tailor each section to suit capacity, comfort, and experience goals.

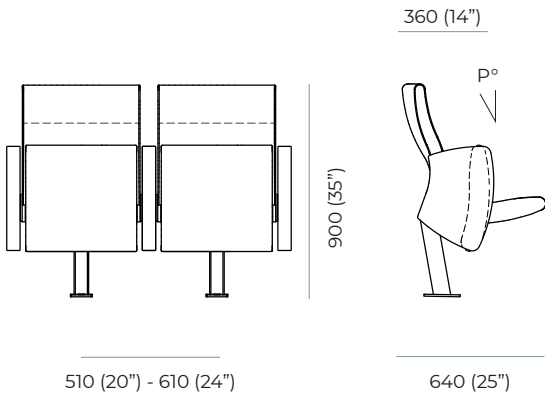

The Arc range is designed to meet specific requirements, ensuring comfort, durability, and adaptability for various venue configurations.
