K-ROLL REMOVABLE SYSTEM

K-Roll System

The K-Roll system is a mobile seating system with wheels that allows the seats to be moved around the space 360 degrees.

Based on the arrangement of groups from 2 to 5 seats.

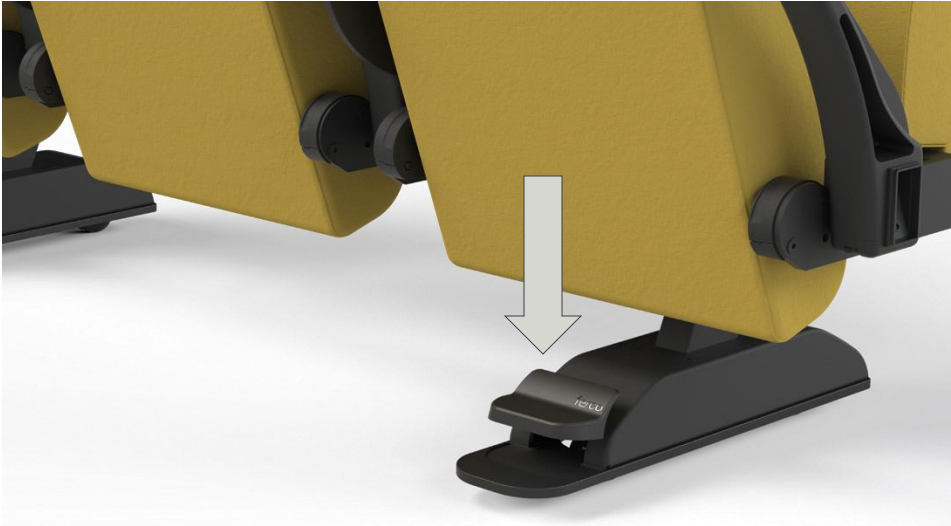

K-Roll allows us to distribute the seats in the space according to the needs of each event, and no additional tools are required for its fixing to the floor.

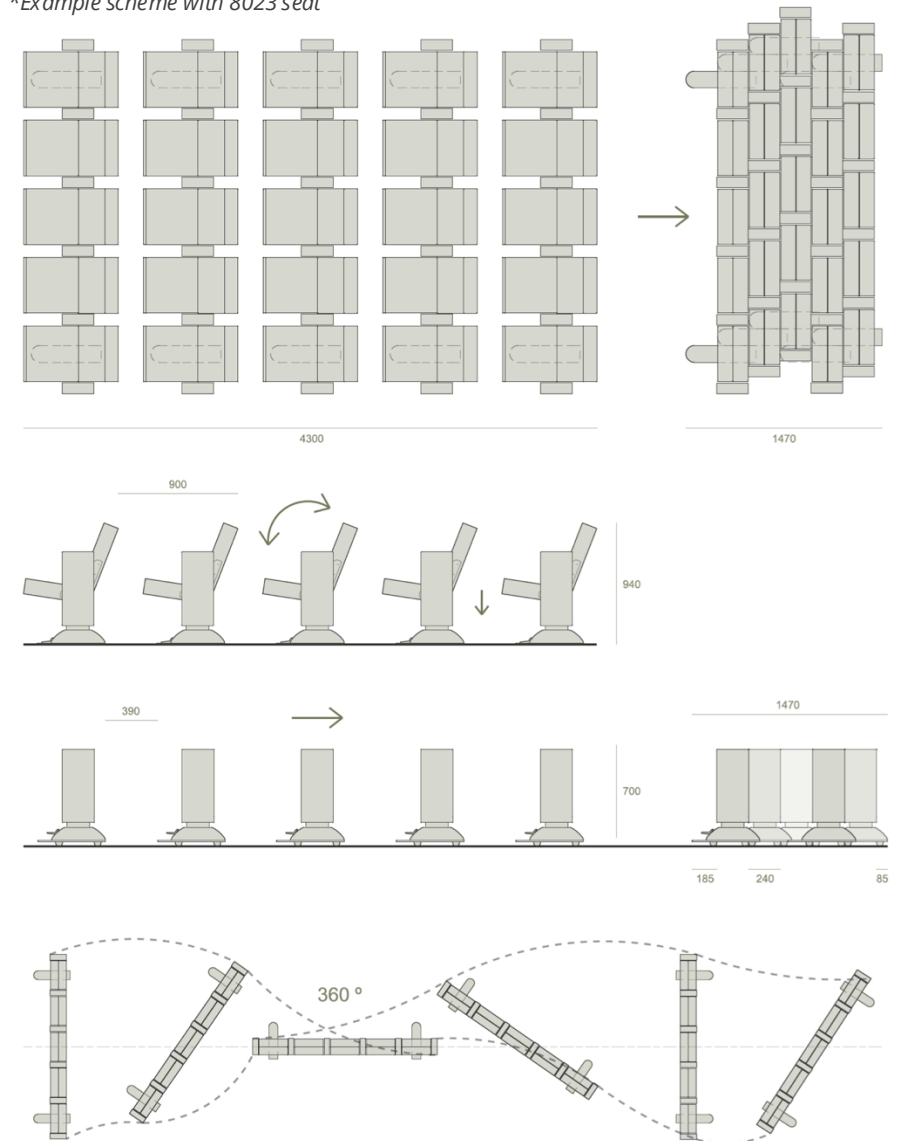

Pia Arena, Japan

K-Roll System – How it works

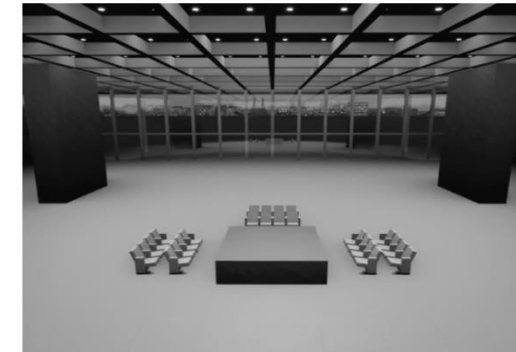

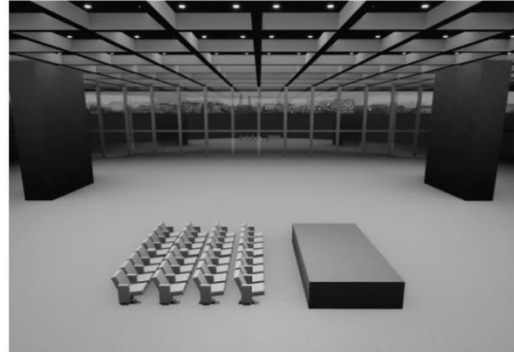

**Example scheme with 8023 seat*

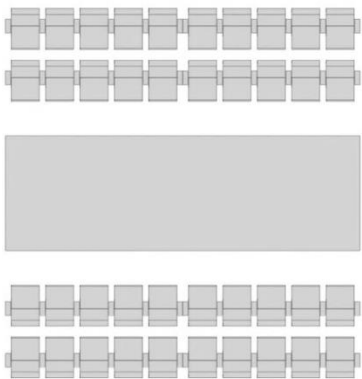

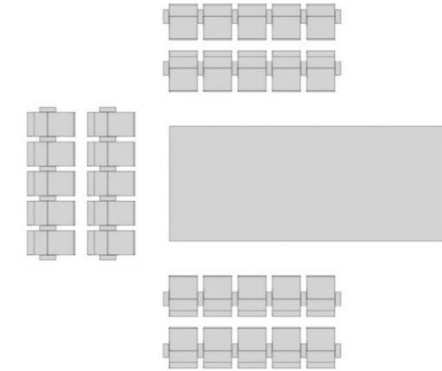

K-Roll System - Configurations

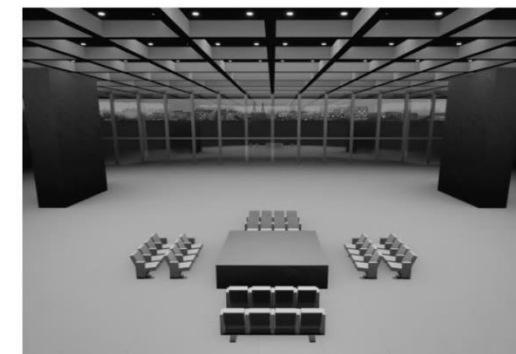

1. Italian / Standard Configuration
